Product Datasheet

10-Channel I/O Board

LB-10I-100

Scalable Access Control to Manage Every Door & Gate

Compatible with LobiBox Video Intercoms and ANPR

This 10-channel input/output board offers versatile, high-reliability digital control for automation and monitoring applications. Featuring 10 relay outputs and 10 optically-isolated digital inputs, it supports robust signal handling and device management. The onboard Ethernet ports enable seamless network integration, while LED indicators and manual test buttons enhance diagnostics and ease of use. This board is ideal for industrial, building, and remote control systems.

Key Features

Remote monitoring and control

On-board test buttons

LED status indicators

Flexible integration options

Common Applications

Monitoring alarm points or system status

Triggering signs, strobes, and sirens

Automating entry systems

Centralized control of remote locations
