2-Door Access Control Board

LB-A2D

Scalable Access Control to Manage Every Door & Gate

Compatible with LobiBox Video Intercoms and ANPR

This 2-door access control board provides secure, reliable management for any-sized installation. It supports two card readers and two door lock outputs, each with dedicated REX and door contact inputs for precise monitoring and control. The board includes Ethernet connectivity with optional PoE for flexible network integration, as well as a 12VDC power input. Two optocoupler outputs allow for additional system integrations such as alarms or indicators. Designed for scalability and efficiency, this controller ensures seamless communication between access points and central management software, delivering dependable access control for offices, residential buildings, and commercial facilities.

Features

- 2-Door Access Control Board
- 2 Card Reader Connections
- 2 Request to Exits
- 2 Door Contact Monitoring Inputs
- 2 Form C Dry Output Relays (Rated 10A)
- 2 Octocoupler Outputs
- 12VDC Input Power
